

JUSTINE CANE V. BACURIN

1151 Torres Bugallon St., Tondo, Manila | 0991 838 6022 | JustineBacurin1927@gmail.com
github.com/justinebacurin1927 | justinebacurin1927.github.io/My-Portfolio/

PROFESSIONAL SUMMARY

Information Technology student and full-stack developer with hands-on experience building production-style web systems in Laravel, Next.js, and Django, alongside technical support and QA internships in the field. Proven ability to design complete systems end-to-end — from database schema to deployment — including a Laravel-based email marketing platform, a role-based clinic/POS system, and an AI-integrated environmental monitoring platform. Comfortable working across the stack with Docker, SQL/PostgreSQL, and modern automation tooling (n8n, Claude Code, MCP integrations).

PROFESSIONAL EXPERIENCE

TambayanPH — Remote, Philippines

February 2025 – Present

AI Engineer

- Develop SaaS products by integrating n8n automation workflows with Claude Code, enabling end-to-end AI-powered business solutions.
- Implement AI-driven solutions using Google's Anti-Gravity framework and Claude by Anthropic, including experimental browser tools, PRDs, and MCP integrations.
- Build scalable automation pipelines covering HTTP request orchestration and third-party API integrations.
- Collaborate with core community members to architect, iterate, and ship real-world automation systems.

Gleent Incorporated — Laguna, Philippines

August 2025 – November 2025

Quality Assurance & Developer Intern

- Performed testing, debugging, and evaluation of multiple systems to ensure functionality and reliability.
- Developed SendFlow, a Laravel-based email marketing system with campaign management, contact segmentation, and multi-step automation workflows.
- Integrated Gmail SMTP and Mailgun webhook handling to support outbound campaign delivery and inbound reply tracking.
- Collaborated with the development team throughout the QA lifecycle to identify issues and implement fixes.

Deutsche Business Solution Inc. — Makati, Philippines

January 2026 – March 2026

Technical Support & Support Desk Intern

- Assembled and troubleshoot hardware including point-of-sale systems, system units, monitors, and receipt printers.
- Conducted network testing to verify connectivity and system functionality across branch locations.
- Organized and managed daily XML files across multiple branches to support accurate data processing.
- Handled ticketing support, resolving and tracking technical issues raised by branches.
- Simulated fuel pump operations and pricing configurations to support system testing and validation.

EDUCATION

Jesus Reigns Christian College — Manila

2023 – 2026 (Expected)

Bachelor of Science in Information Technology

Philippine College of Advanced Arts and Technology — Manila

2021 – 2023

Senior High School, ICT Strand

Lakan Dula High School — Manila

2017 – 2021

Junior High School

PROJECTS

SendFlow — Email Marketing Platform (Laravel, PostgreSQL, Mailgun, Docker)

github.com/justinebacurin1927/Email-Marketing

- Built a full email marketing platform with campaign CRUD, audience segmentation via tags, and multi-step automation workflows (e.g., trigger-based welcome/follow-up sequences).

- Implemented a live inbound inbox using Mailgun webhooks, linking replies to subscribed contacts and filtering out non-subscribers.
- Deployed to production on Render with a PostgreSQL backend on Supabase, with uptime monitoring to prevent server downtime.
- Also developed a companion mobile version (SendFlow-Mobile).

Eyecare Optical Management System (*Laravel 11, Bootstrap 5, Alpine.js, Chart.js*)

github.com/justinebacurin1927/Eyecare-Optical-Management-System

- Designed and developed a role-based clinic and point-of-sale management system for Eyecare Optics Manila, converting manual retail operations into a digital workflow.
- Built patient management with detailed prescription tracking (sphere, cylinder, axis, PD, lens type) and inventory management for frames and lens types.
- Implemented role-based access control across Admin, Staff, and Doctor accounts with dashboard analytics (sales trends, category breakdowns).

AI-Enhanced Bubble Curtain System (*Django, YOLOv8, Computer Vision, IoT*)

github.com/ralphrowel/AI-Enhanced-BubbleCurtain-System

- Contributed to an AI-integrated environmental monitoring system combining IoT sensor data with real-time YOLOv8-based image detection for river debris.
- Built alerting and live media streaming modules to support automated debris detection and response.

ARKO — Startup Operations System (*Next.js 15, TypeScript, tRPC, Prisma, PostgreSQL*)

github.com/justinebacurin1927/Internal-ARKO-System

- Built an internal startup operations platform covering finance tracking, task management (Kanban), and workflow automation in a Turborepo monorepo.
- Implemented type-safe APIs end-to-end with tRPC and a PostgreSQL schema managed via Prisma ORM.

Employee Payroll System

- Developed a payroll system that automatically computes employee wages based on time-in/time-out records, reducing manual calculation errors.

TECHNICAL SKILLS

Languages: C++, Java, JavaScript, TypeScript, PHP, Python

Frameworks: Laravel, Next.js, Django, tRPC

Databases: SQL, PostgreSQL, Prisma ORM

DevOps/Tools: Docker, Git/GitHub, n8n, Claude Code, MCP

Software: Canva, Microsoft Word, Excel, Google Docs, Google Sheets

ADDITIONAL SKILLS

Team Management | Communication | Time Management | Adaptability | Critical Thinking
